

Entry Level PHP/Web Developer, N1
£18,000 - £20,000

Would you like to work for a small and funky web company specialising in female- and child-oriented web shop solutions?

We are looking to recruit a PHP and Web Developer to build client websites and liaise with our customers.

The company

Moustique Design is a creative web and graphic design agency in London, established in 2003.

These are the people in our team: the owner, a PHP programmer, a HTML coder, a graphic designer, some freelancers - and you.

We work mainly with small companies who are looking for fun and functional web sites.

Designs are innovative and individual each time.

Our challenge - and yours - is to translate this into usable web sites: we believe in accessibility for everyone and have high technical requirements and standards that we work to. All our web sites need to be hand-coded to W3C (the web authority) standards and be as close to Bobby (usability and inclusivity for people with impairments) standards as can be: we want our sites to be useable by the blind and colour blind - anyone, regardless of their abilities. Sites need to work across browsers and on smart phones. We also offer Iphone and Facebook apps to our customers.

Your job

Your contribution will be critical in helping us get ahead of the competition. We want to give you total responsibility to deliver significant projects on time, budget and according to the brief.

As PHP Developer / Web Developer (PHP, MySQL, CSS, HTML) you will:

- * understand and write valid XHTML and complex CSS
- * understand and write correct object-oriented PHP
- * be at ease using Photoshop, Office, Illustrator
- * have experience of the OsCommerce, Joomla and Wordpress frameworks
- * have experience with JavaScript and Ajax

Whilst you will have strong basic programming skills, gained perhaps from a Computer Science degree, you should be keen to develop these. This role will encourage you to learn lots. You will be professional when dealing with customers, have a strong sense of responsibility and an outgoing personality and be willing to get stuck in.

The right person will:

- * have good written and spoken English
- * be self disciplined, an independent learner
- * have attention to detail and be accurate
- * be able to fit in with a team
- * ideally understand German

What do we need from you?

To apply, email your CV and a covering letter detailing how you match up to our high expectations. Your details, as submitted by you, will only be used in conjunction with this vacancy. Please note that no terminology in this advert is intended to discriminate, and we confirm that we will gladly accept applications from persons of any age, gender and background for this role.

Keywords: PHP, Web Developer, MySQL, CSS, HTML, New Media.

Your point of contact will be Anuschka Fritz, please email anuschka@moustique.net.

Start Date: 15 October or 01 November 2011
We are looking forward to meeting you.
